About This Game

Welcome to Rivercastle, the once rich trading town that is slowly falling into decline nowadays. The imperial governor doesn't care about his duties and all he does is hunt and carousing. Plaster walls of the theater crack, and the director of the local academy of natural philosophy (a small establishment, yet very proud one) spends his time not in the silence of the classrooms, but in the company of some shady characters that have established some kind of an amateur occultist society... No wonder that of all the vast pantheon townspeople respect the god of lazy contemplation and hedonism. In fact, the head of the city temple is also the Archpriest of this deity.

But those who are living such a stable life sometimes can't notice a sinister danger that remains hidden from human minds and eyes. The evil that has been lurking nearby for quite a long time is now ready to strike at any moment.

The dark gods are turning their gaze towards this town. You are one of the many servants of the strife god, and your task is to possess the mind of the local archpriest in order to sow wickedness and discordance in the town. But your character is a

disembodied demon, so you'll have to reach your dark goal by the hands of townsmen.

Features:

- Different ways to achieve your ultimate goal;
- Various character interactions that directly affect the gameplay;
- A tongue-in-cheek fantasy world, the details and lore of which are revealed through the dialogues with characters.

At first I thought I'm doing it wrong, but then I realised: this game isn't a very exiting take on the priest/possession-theme. I'm a little saddned, for I have expected more than ever the same dialogues and slow walking across the map. not recommended. :(
