id recommend this game i love the play style and the graphics i like the different mechanics within the game to create different robots so that you can fight and win the game differently each time. id recommend this game i love the play style and the graphics i like the different mechanics within the game to create different robots so that you can fight and win the game differently each time. For two bucks I got almost 10 hours out of it.. I like the idea of this game a lot. it isn't super polished at the moment, and from the Dev's communication it's hard to tell if there are future updates planned. That said, the premise of the game is good and the gameplay itself is pretty fun.. For two bucks I got almost 10 hours out of it..
